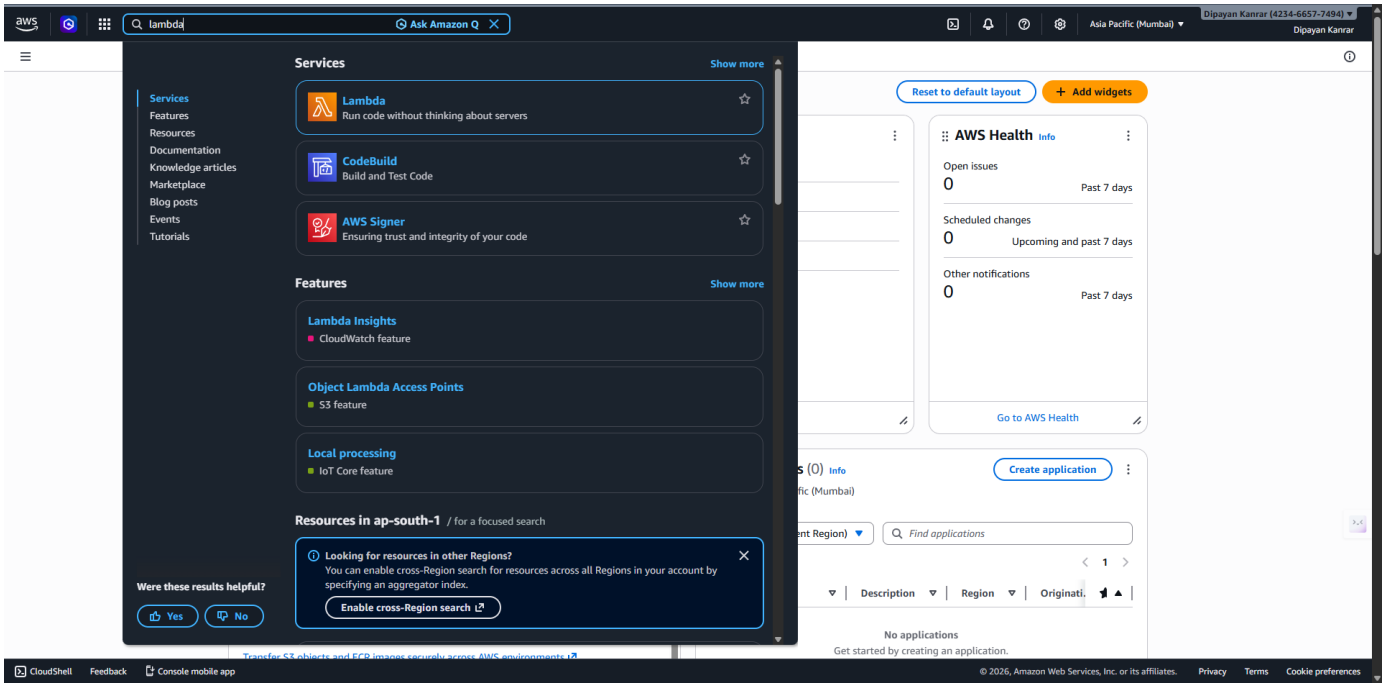
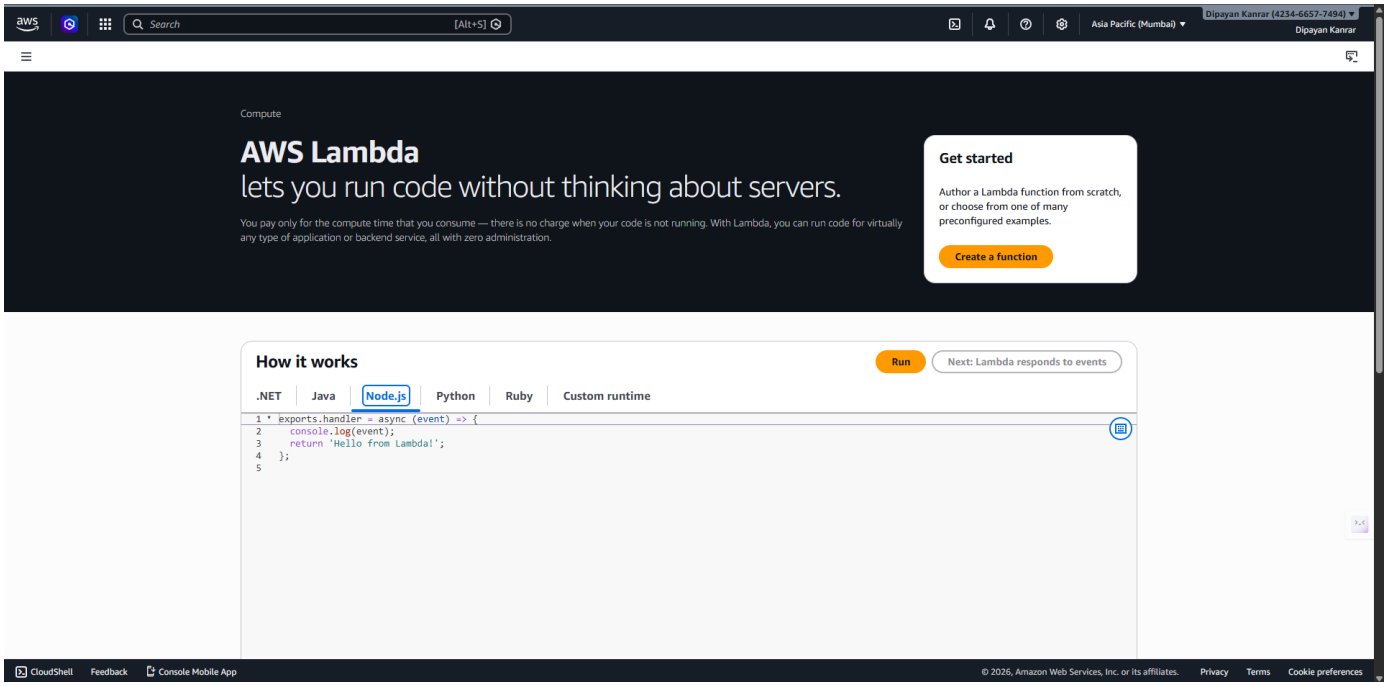
Assignment-15

Problem Statement: Create a serverless computing service.

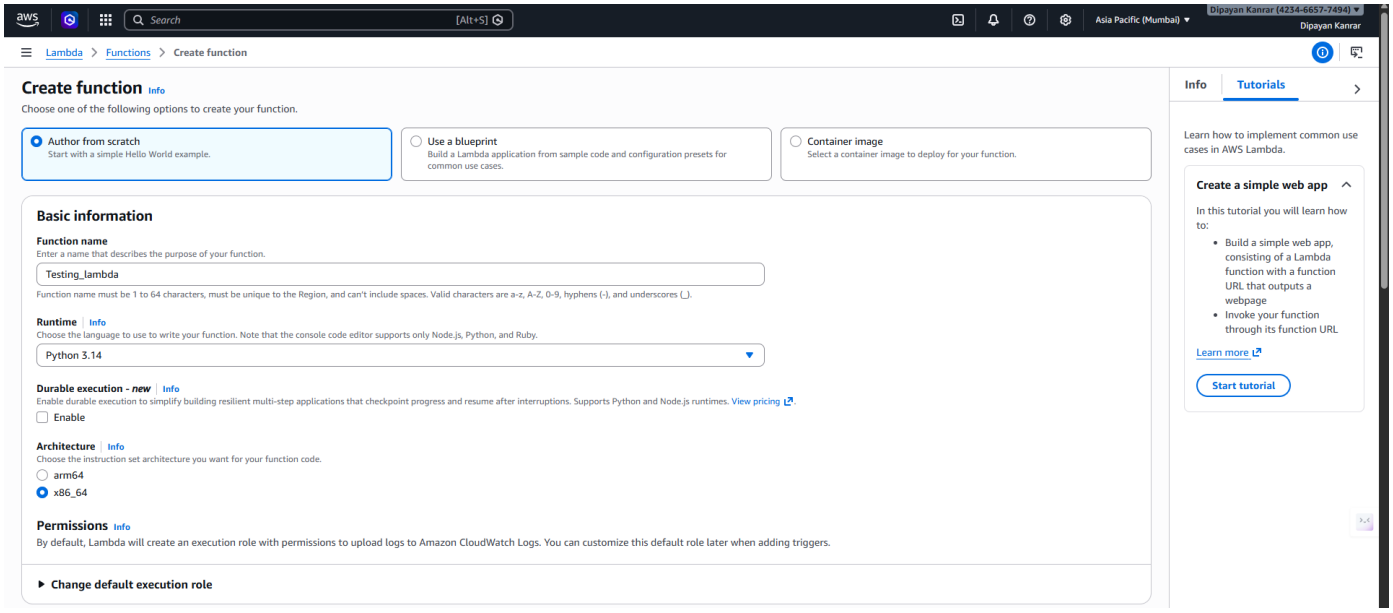
STEP 1: Search for Lambda and click on it.



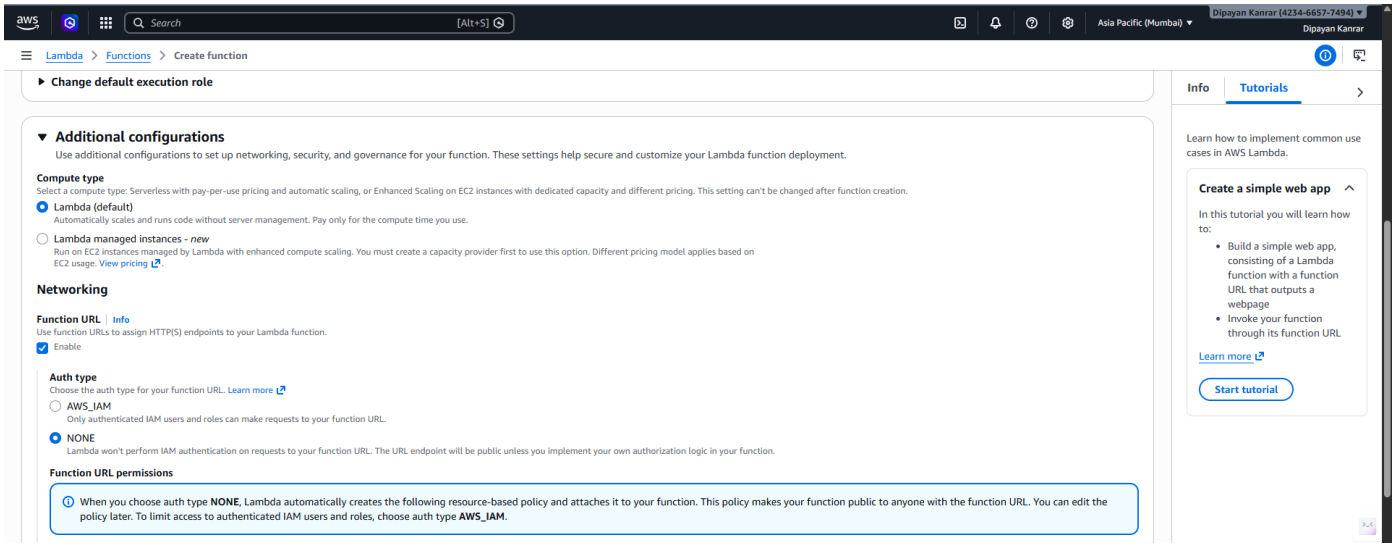
STEP 2: Click on Create a function button.



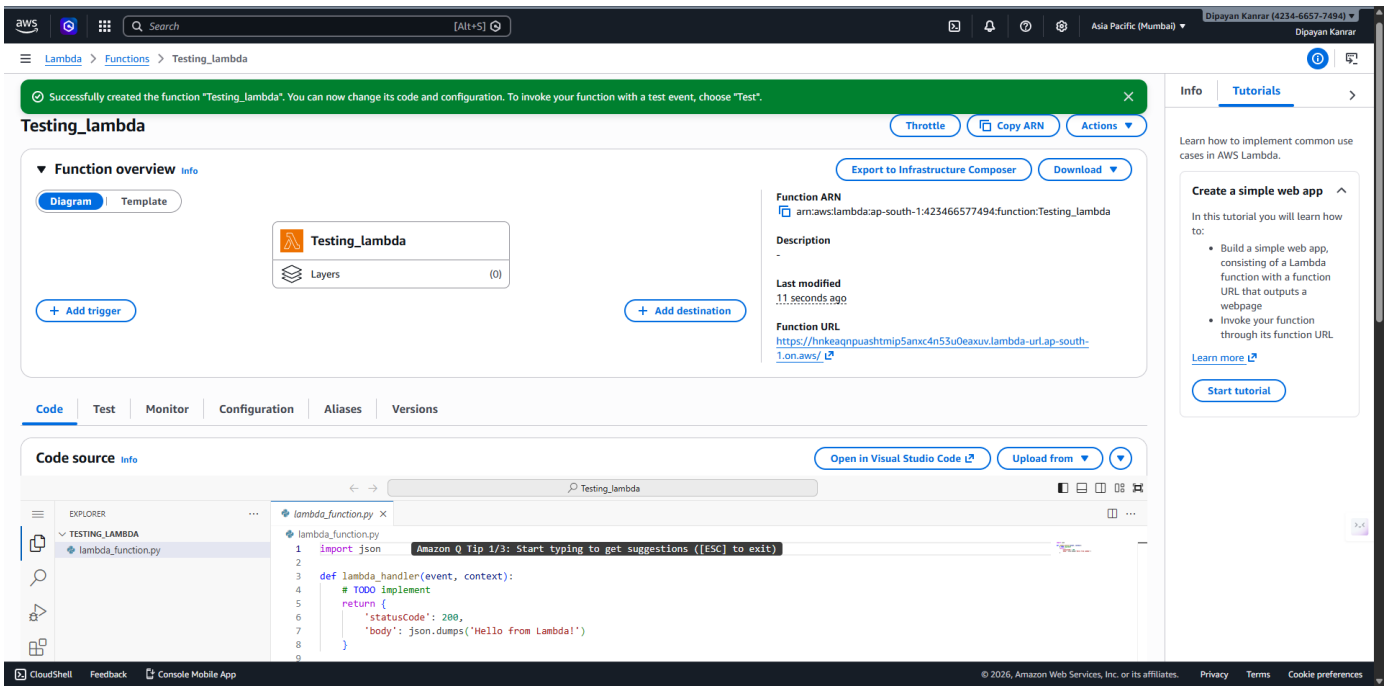
STEP 3: Give a name to the function and under runtime select Python.



STEP 4: Under the Additional configuration , check the Enable Function URL checkbox & under Auth type, select NONE. Then click on Create Function.



STEP 5: The function has been created. Now copy the function URL and paste it on a new tab.



STEP 6: The following output should be obtained
